Curtis Bowser

Severn, MD

SUMMARY

Web developer with a Bachelor's in Economics and working as a freelancer to create websites for local businesses. Blend of front-end and back-end skills, coupled with a keen understanding of economic principles. Learn new technologies promptly due to a strong basis in programming fundamentals after exposure to many different parts of programming, such as web development, data science, and game development.

WORK EXPERIENCE

Freelance Web Developer at Beachside Design, Salisbury, MD

December 2023 — Present

- Constructed client sites to increase outreach and sales by providing performant sites with good SEO.
- Built hand-coded sites with React, HTML, and CSS.
- Designed templates to be able to be easily modified by clients to incorporate their brand identity.

Projects:

Design Portfolio (Live Site) (NextJS) – This is a design portfolio template built with NextJS, React, Tailwind, and a headless CMS deployed on Netlify. Owners can edit their own content and they also get a website with a Lighthouse Score over 95% in all categories.

Beachside Design (Live Site) (NextJS) – This project advertises static website development services to local businesses. The website also provides information about the many benefits of having a site to local businesses. It is fully responsive, has a working contact form, and is deployed with Netlify.

Front End Developer at Self-Taught, Salisbury, MD

January 2022 — November 2023

- Built modern and responsive web applications using best practices
- Built semantically structured full-stack web applications
- Used Git and GitHub to manage many projects while continuing their development

Projects:

Portfolio (NextJs) – Features include a dark mode and contact sheet implemented in JavaScript. The site is built from the ground up with NextJS, TailwindCSS, and working contact forms.

Squid Runner (Play Here) (Godot) – Endless runner game made with Godot that is released on Itch.io. It features custom made sound effects, character, and is infinitely replayable.

Gardienne (Live Site) (NextJS) – Gardienne helps users manage their plant's watering times. It uses NextJS, TypeScript, React, NextAuth for user authentication, NodeJS, Prisma, and a MongoDB database for storing user information.

Photography Site (Live Site) (React) – This site was built in React and uses Material UI components to display photography. Uses hooks to filter by category and user selection.

Other Projects: Sentiment predictor, a drawing app, BMI calculator, random quote generator, and background color changer.
